Student Management Portal Blog

Welcome to the Student Management Portal

This project is developed using React. It allows administrators and students to manage academic information efficiently through a user-friendly interface.

Features of the Application

The Student Management Portal includes student registration, attendance management, score calculation, and course management to simplify academic activities.

React Component Lifecycle

This page demonstrates the React component lifecycle. The `componentDidMount()` method is used after the component is rendered, and `componentDidCatch()` is used for handling runtime errors.

Benefits of React

React provides reusable components, Virtual DOM, efficient rendering, and better application performance, making modern web development easier.

Future Enhancements

Future improvements include JWT authentication, REST API integration using Spring Boot, database connectivity, and cloud deployment.
